Overview

The HP7/RS7 Air Intake kit is designed for use with the HP7 and helmets based on this design including the RS7 Carbon, RS7, RS7 Kart and KC7 CMR. The kit includes an upper and lower forehead air intake

and a right and left side vent intake. The air intake kit is designed to force airflow into the helmet's ventilation channels to enhance and maximize air exchange inside the helmet. The HP7 air intake kit is available in clear, white, matte black and Carbon and attaches to the helmet using aggressive double sided adhesive
